Model our Communication

Chapter 1 addressed the trial and error models of communication throughout time. It is important to understand all three of these models in order to appreciate the complexity of communication as a whole. In this activity you will draw and label these models of communication. Do not look in your book for reference, and make sure to label all the key words in each drawing (listed on the following page). This will help you to recall information and to be able to apply it when conversing.

1. _____ Model of Communication

2. _____ Model of Communication

3. _____ Model of Communication

Key Words in Communication Models

- Source
- Encoding
- Linear Model of Communication
- Message
- Channel
- Transactional Model of Communication
